SENTAC

The Society for Ear, Nose, and
Throat Advances in Children

President's Message

Yell Inverso, AuD, PhD

It is with great joy and an immense pride that I write this message, though I have to marvel at how quickly the year has passed. It is chilling that this time last year I was organizing the Fall 2015 newsletter, carefully balancing my laptop upon my giant pregnant belly, and lamenting that I would not be allowed to fly to Texas for the meeting. I want to thank the membership for understanding, and I am happy to introduce you, my colleagues and friends, to Opal Luna Inverso-Meyers (see photo). Our sweet Opal was born Monday December 7, 2015 just days after my video address was played at the business meeting. I suppose the contemplated 3-day train ride from Philly to Texas really would have been ill-advised.

In her President's address last year Julie told her SENTAC story, and I feel it is a tradition worth keeping. I attended my first SENTAC meeting in show of support for a dear colleague, Udayan Shah. He was President that year and I wanted to support him in any way that I could. That year I presented as part of the pre-symposium course as well as podium or two, but what was most exciting was Nemours' strong showing. I recall that we filled two tables with our ENTs, PAs, Audiologists, and even an SLP or two. What began as a show of solidarity, soon became much more. Ever since that first meeting I have been a member of the board, which has led to valued friendships and mentors. SENTAC, in my eyes, represents the best that a society can offer as it promotes the clinical diversity that is needed to truly elevate care for children with disorders of the Ear, Nose or Throat. I have learned a great deal this year serving as your president and have had the honor of working with our past-president and inspiring program chair, Julie Wei. To put it simply, Julie is a dynamo in Ferragamos! 2016 has been a year of transition for SENTAC; however, I cannot imagine anyone responding with more grace and energy that Julie has. She, along with the entire program committee, deserve our gratitude for the stellar program we will enjoy in Orlando!

Finally, I would like to thank our dedicated officers. Deepak Mehta, our Treasurer, whose steadfast stewardship is unparalleled. We owe our organized membership database to our ever-witty Secretary, Patrick Barth. Without Patrick, and the very talented Brandon Petersen, many of you would not even be reading this newsletter! I also wish to thank our diverse team of board members: David White, Gail Ezell, Stephanie Zacharias, Claire Miller, Ashley O'Neill, Terri Giordano, Daniela Carvalho, Anthony Hughes, and Sharon Cushing. I could not be more honored to serve as President with this diverse and dedicated group of individuals. It is because of each of you that SENTAC is a thriving society poised to lead and teach the next generation of pediatric practitioners. I again thank you for allowing me to serve as your President this past year. I cannot wait to see you in Orlando for our best SENTAC meeting yet!

Secretary's Report

Patrick Barth, MD

This year to date, I have received and reviewed 18 applications for new membership from various interdisciplinary professionals: 13 MD/DOs, 5 Advanced Nurse Practitioners. This is on par with previous years; 15 in 2014, 22 in 2013 and 26 in 2012. Please encourage all of your colleagues, trainees and team members to attend SENTAC and apply for membership as the number grows as the meeting approaches.

Our organization's rich history in multidisciplinary care serves as a model of how we provide care today. This provides for diverse meeting content and energetic discussion across our multiple specialties. This vitality is dependent on committed members from all disciplines. I hope all of you will continue to encourage not only residents and fellows, but especially our colleagues, to participate and become members.

If a colleague of yours no longer receives our communications, please have them reach out to us because we have probably already tried to contact them. In these changing times of academic medicine we need to continue to be nimble and creative to support this combined effort. I look forward to a great meeting in Orlando.

SENTAC
Congratulates:

Amelia Drake, MD, on being the first otolaryngologist to be elected president of the American Cleft Palate-Craniofacial Association.

Things to do in Orlando during SENTAC weekend 12/1-12/4

Christmas in the Park 12/1-12/4

The Charles Hosmer Morse Museum of American Art The Morse Museum kicks off the holiday season by lighting up its glass Tiffany windows. The Bach Festival Choir and Brass Ensemble also performs a free outdoor concert during the event.

<http://www.morsemuseum.org/programs-events/christmas-in-the-park>

Holidays Around the World at Epcot 12/1-12/4

Epcot (Lake Buena Vista)

This Epcot tradition features storytellers, a daily character tree-lighting ceremony and a stunning display of snow-white lights. The Candlelight Processional, a favorite of all ages, includes celebrity guest narrators, accompanied by a massed choir and orchestra for a retelling of the Christmas story.

<https://disneyworld.disney.go.com/events-tours/epcot/holidays-around-the-world/>

ICE! At Gaylord Palms 12/1-12/4

Gaylord Palms Resort & Convention Center

Explore ICE at Gaylord Palms annual ice attraction.

This year look at Charlie Brown discover the meaning of Christmas through the interactive hand-carved ice sculptures and displays. Stare in wonder at the award-winning attraction carved by a team of 40 skilled artisans using 2 million pounds of ice.

<http://www.marriott.com/hotel-info/mcogp-gaylord-palms-resort-and-convention-center/gaylord-christmas/csyr9pd/ice.mi>

Light Up UCF 12/1-12/4

CFE Arena

Light Up UCF is an affordable family winter wonderland featuring ice skating, rides, and an all-new light show. The Light Up UCF Ice Rink serves as the centerpiece for the event. Guests are invited to enjoy Central Florida's largest outdoor ice skating rink while gliding along to their favorite holiday tunes spun by a live DJ.

Treasurer's Report

Deepak Mehta, MD

Greetings! As we plan for our annual meeting in Orlando in December, I reflect on my third and final year

servicing the society as treasurer. This has not been an easy three years, with growing costs of running a meeting and trying to continue our traditional meeting style that we really enjoy. My aim has been to run the finances in such a way so that we maintain a healthy balance, keeping the expenses within budget while not drastically changing our meeting experience. And I am glad to say that we managed to do that over the last 3 years successfully. Our finances have been stable, and this has been possible by lot of support and advice from some of our members who have helped me through this.

We have also had a big transition in the meeting planning department. Cindy Freeman is no longer our meeting planner, and we have contracted with the University of Central Florida's Continuing Education department to help us plan this year's meeting. The transition has been smooth so far and we are looking forward to a continued relationship. Kudos to Julie Wei for being instrumental in making this change possible.

The campaign run last year to support the SENTAC development fund was fairly successful, and we plan to repeat the effort this year. The aim of this fund is to strengthen our educational and peer recognition goals through the awards and grants supported by SENTAC. Donations are recognized as follows: Diamond Circle \$1000, Platinum Circle \$500 and Gold Circle \$100. I would like to urge the members who have not contributed yet to consider doing so (www.sentac.org/contribute-to-sentac/). Additionally, we should each look within our department for individuals who could add to our current membership and we should encourage them to do so.

Looking at the program assembled by Julie Wei and her team, it looks like an academic feast is going to happen in Orlando. I am looking forward to seeing you all there.

More things to do in Orlando during SENTAC weekend 12/1-12/4

(Continued from page 2)

Shanghai Acrobats "Shanghai Nights" 12/1

Dr. Phillips Center for the Performing Arts

The company of Shanghai Acrobats of the People's Republic of China 2016 was founded in 1959 and belongs to the artistic entities of governmental finance allocation (state-owned enterprise). After more than 50 years' efforts, it has become one of the most influential and competitive acrobatic companies in China and has won many awards at the acrobatic and circus competitions at home and abroad.

The premise of "Shanghai Nights" is a dream journey, where a young boy enters into the world of fantasy, seeing a beautiful fairy phoenix flying over the sea. The boy, attracted to the beauty, runs to the water, and the adventure begins.

Program Chair's Report

Julie Wei, MD

Dear SENTAC friends and colleagues, in just a few weeks I hope you will be in sunny and warm Orlando, Florida, to experience the 43rd year of the annual SENTAC meeting. We are delighted to welcome our international colleagues who will join the first ever combined meeting of [IAPO](#) (Interamerican Association of Pediatric Otorhinolaryngology). I thank Tania Sih and Margaretha Casselbrant who made this possible.

This year's meeting will be held at the incredible Rosen Shingle Creek Hotel and Resorts. What is so special is that this hotel is owned by [Mr. Harris Rosen](#), whom I have met and is an incredible philanthropist who has positively influenced the communities in Orlando. One of his countless philanthropic programs includes providing free early childhood education and even college education for children from the most impoverished neighborhoods in Orlando. I hope to greet you at our welcome reception on Thursday evening December 1st, and the meeting on December 2-4th.

As the program chair, I have had the honor and incredible responsibility to work with our program committee to create a [program](#) that truly embodies the SENTAC [missions](#). This year's program was planned to reflect our missions: 43 YEARS OF INTER AND MULTIDISCIPLINARY CARE: OUR PASSION, COMMITMENT, AND EXTRAORDINARY JOURNEY. Having served as the Historian for our society, I have had the privilege of seeing program pamphlets from 1974 and throughout the years. This, and seeing those type-written correspondences between members, has allowed me to appreciate why all of us must continue to contribute and ensure the longevity the society, and carry out the legacy established by those before us who dedicated their lives and careers caring for children and their families.

When you come to our meeting, please help me express sincere gratitude to our entire program committee who helped to create our 6 panels, 3 lunch breakouts, and 2 symposiums. This meeting includes 65 podium presentations and 50 posters, a reflection of the continued enthusiasm by trainees and members alike, for knowledge sharing and commitment to research. You will find that every one of our panels cross multiple disciplines and represent topics that are focus on those who are the most challenging for us to care for, regardless of our specialization. I am particularly excited for the first ever session on tracheostomy and a panel focused on challenges in caring for medically complex children who are tracheostomy- and gastrostomy tube-dependent. It would not be fair to highlight any single panel, as I assure you every one of them will have energetic and expert speakers.

We are grateful to the so far eight exhibitors supporting us, and they will be our invited guests on Thursday evening during our welcome reception/cocktails at the Rosen. Similar to prior years, Friday will be an all-day meeting with 3 lunch breakouts that you can choose from. Friday evening will be our poster reception, followed by our special banquet dinner. Your registration fee covers every meal except Saturday dinner, and covers the banquet! This year during the banquet, you will enjoy music performances by pianist [Cheryl Tschanz](#) and vocalist/artist [Sasha Aleksandra Vargas](#). We will again have an all-day scientific meeting on Saturday, and the concurrent IAPO session will occur from 3:30-5:30 pm. Our Sunday scientific meeting will end at 11am.

As always, we look forward to honoring Dr. Robert Ruben, Dr. Sylvan Stool, and Dr. Steven Gray through their established Scientific Achievement, Teaching, and Humanitarian Awards, respectively, and you will hear incredible presentations from the honorees Dr. Karen Pape (Ruben), Dr. Anthony Magit (Stool), and Dr. Dana Suskind (Gray).

Please also meet and thank our new meeting planners, Dorothy Loman and Andrea Berry, from the University of Central Florida & the UCF College of Medicine. This year has been challenging during our change in meeting planners, but despite all obstacles, I am truly grateful that with their help, and that of our officers and board members, SENTAC will thrive and our meeting will be spectacular!

Dining at SENTAC 2016

The Rosen Shingle Creek has two fine dining restaurants on premises.

1. Cala Bella Italian Restaurant (Reservation required)
<http://www.calabellarestaurant.com/>
2. A Land Remembered Steakhouse (Reservation required)
<http://www.landrememberedrestaurant.com/>

Other options provided by the hotel concierge:
